

SUPER STRIPPER!
Fast Action for the
Non-Routine Stripping
Job.

BREAKDOWN CONCENTRATE

1. Penetrators
 Provide quick penetration of tough floor finish.

2. Dissolvers
 Chemically break the bonds of old finish and wax.

3. Emulsifiers
 Return old solids to liquid state quickly for complete removal

Old, tough floor finish has met its match with this fast action, heavy-duty stripper. It is specially formulated for the removal of high solids finishes, “case hardened” polymer build-up, hard metal crosslinked finish/wax, multiple floor finish applications and repeated spray buffing / recoating.

An energy saver, the outstanding chemical action of this stripper significantly reduces manpower needed. Unlike conventional strippers where hot water is a must, this product performs excellently under cold or hot water conditions.

Our super stripper cuts through today’s toughest jobs as easy as 1,2,3 —
 1) Penetrators. 2) Dissolvers and
 3) Emulsifiers. Together these hard-working components get the job done fast.

Breakdown regular concentrate may be diluted 1 part stripper to 5 – 10 parts water. Always adjust the dilution of a wax stripper to level needed for a specific job. Use through a Lyn Distributing auto proportioner set at 5 to 10 parts water to 1 part concentrate.

The above three-step process insures complete, in-depth removal of medium to heavy build-ups – right down to the surface without repeated scrubbing. The high concentration of surface active ingredients is the key to its effectiveness...67% greater than conventional strippers! This stripper is easy to use. It has a pleasant odor, contains no ammonia. It’s biodegradable, nonflammable and low foaming. For use with conventional or automatic equipment.
