

DIAMOND LUSTER

24-26% solids

- *Easy Maintenance*
- *High Traffic*
- *Metal Interlocked Floor Finish*
- *Crosslinked Polymers*
- *Tough, Medium Hard Finish*
- *Excellent in Traffic Areas*

Description

This high gloss, water emulsion floor finish is formulated using a blend of metal interlocked and crosslinked polymers with short chain polymers for a tough, crystal clear, film which resists repeated detergent cleaning. Will not powder or yellow, easily maintained, will not black mark and does not require buffing to retain its original luster and beauty. This product may be used to protect and finish vinyl, vinyl asbestos, rubber, terrazzo, linoleum, and marble floors. Heavy traffic areas may be recoated to blend invisibly with original coat without restripping entire floor. Highly scrubbable with ordinary cleaners. Strippable with ammoniated or butyl based wax stripper. Mirror-like gloss, detergent resistant, resistant to scuffing, anti-slip. Perfect for high traffic areas. Ready to use.

Areas of Use

This product is ideal for high traffic such as hotels and motels, government offices, hospitals, airports and transportation terminals, county and city schools along with other areas where appearance and beauty are of prime importance.

Directions

Prior to application of this product, floor surface should be properly prepared. Strip all old finish or wax from floor and rinse thoroughly with clear water to remove any residue from stripper. Allow floor to dry completely. Apply first coat of product in a thin, even film using a lamb's wool or synthetic applicator or clean, dry string mop. Allow to dry for at least 20 minutes. Apply second coat in same manner. For maximum beauty and luster, apply a third coat in the same manner.

MAINTENANCE: Dust mop daily. Damp mop when required using a solution of 1 part product with three parts water. Pick up dirty solution with mop and wring out. Allow to dry. This procedure may be repeated until stripping and refinishing is required.
