

INSTANT REPLAY

Concentrated Spray Buff & Restorer

INSTANT REPLAY was formulated to clean, repair and restore the shine of today's modern high gloss floor finishes, this solvent emulsion incorporates detergents and polymers to quickly penetrate surface soil while removing black heel marks, scuffs and repairing light scratches. The unique acrylic ethylene copolymer in the product not only restores but enhances the original gloss of your floor finish. Continued use of Instant Replay in a prescribed maintenance program will reduce overall maintenance costs with less frequent stripping and re-coating.

BENEFITS: *Economical*- reduces floor maintenance costs by extending time between stripping floors. May be diluted with up to 10 parts water for normal maintenance.

Effective-cleans and shines in one operation, a special blend of detergents, copolymers and solvent provide fast, effective repair of high traffic floors.

Versatile-may be used with low to ultra high speed floor equipment to provide optimum appearance.

Pleasant-and easy to use. No fumes or lingering solvent odors. Provides excellent slip resistance properties.

DIRECTIONS: Sweep large debris and dust mop (preferably with a water based dust mop treatment like "ATTRACK ALL"). For best results, damp mop as needed using a neutral cleaner (NC-183 OR CONQUER). Make sure the floor is dry before beginning the spray buff procedure. Apply diluted product through appropriate dispenser to the width of your pass. Buff as require, remember that the more aggressive the pad the more floor finish will be removed. We suggest using a *Hog Hair pad or white super rubberized pad*. Dust mop floor to pick up any residue. Clean and store all equipment.
