

This wax stripper is designed for maximum performance without the noxious ammonia fumes of common strippers. This highly concentrated stripper will remove all types of natural and synthetic finishes, including the detergent resistant, metal interlock acrylic finishes. Ideal for all hospitals, nursing homes, and any other area where ammonia and other noxious fumes may be unacceptable.

**Directions:** Use 6 to 10 ounces per gallon of hot water. Mop on stripper solution and allow to act for 5 to 10 minutes. Pick up the stripper solution and residue, then rinse thoroughly. Heavy build-ups may require scrubbing or stronger solution.
