

SHIELD

The Very Finest In Resilient Floor Care Finishes

Our unique, high solids linear polymer finish outlasts and outshines competitive floor finishes. It produces a tough, slip-resistant finish that shrugs off detergent, water and soil—even in the heaviest traffic.

Formulated with special metal cross-link polymers, it becomes a hard barrier that protects floors from abrasion, scuffing and marking. It can add years to the life of your floor!

Self-sealing formula eliminates the need for sealers or undercoaters, thus reducing your labor time. It smooths the surface and restores its origi-

nal color and appearance. It's easy to apply and dries quickly to a "wet look", high-gloss finish responsive to conventional or ultra high speed burnishing. May be recoated quickly for rush jobs.

Saves you time and money, for two coats provide the gloss and durability of three or more coats of conventional finishes of lower solids content. The results are less frequent stripping, re-coating and touching up, plus that "like-new" look at tremendous savings! Always gives you more miles per gallon!
