

N.C.-183

- Neutral pH Cleaner
- Medium Suds
- Leaves Protective Film
- Non-Flammable
- Concentrated
- Biodegradable
- Pleasant Lime Scent

Description

All purpose cold water detergent, 100% biodegradable surfactants with synergized phosphates and wetting agents added. Gives medium suds, and has thin viscosity. This detergent contains a wide range of chemicals for maximum efficiency in attacking all types of dirt and grime on any type of floor. Upon drying, it leaves a protective film for added beauty and slip resistant luster. In addition to use on floors, this detergent is also useful in cleaning walls, counters, woodwork, blinds, porcelain, or any painted or commercially enameled wood or metal surface without harm to hands. The detergent is equally efficient in cold or hot water, and excellent for hard-water areas. In extremely hard water areas, check with your distributor. Dilutes from 1 : 16 to 1 : 64 with water depending on application.

Areas of Use

Industries, schools, restaurants, hospitals, nursing homes, apartments, churches, office buildings and any facility that requires a biodegradable cleaner.

Directions

For light cleaning, use 2 to 4 ounces detergent per gallon of water. Mop or sponge the area to be cleaned. Pick up excess fluid, let the area dry, and buff for added luster.

For heavy cleaning, use 4 to 8 ounces detergent per gallon of water. Allow the solution to remain on the floor for 5 to 10 minutes, then remove from the floor. For exceptionally dirty floors, use a scrubbing machine or stiff brush. Rinse the surface to remove cleaner.
