

SUB 0-50°

Freezer And Locker Cleaner

Cleans at sub freezing temperatures!

Here is one of the newest, most effective cleaning agents for use anywhere cleaning is to be accomplished at below freezing conditions. The formula is specifically designed to provide a fast, efficient and practical means of cleaning frozen food storage areas where conventional cleaners freeze solid. The ability to resist freezing to -50° F is coupled with hard working cleaning action to penetrate, dissolve and suspend soil for easy removal by wiping, mopping, squeegee, or wet vacuum machine pickup. Costly shutdowns can now be eliminated, as frozen food storage areas operating at -10° F can now be easily cleaned of dirt, grime, fats and grease deposits during regular operations. Cleaning properties give all the cleaning power the job demands- with safety. Include this product today in your regular maintenance program for all sub-freezing and frozen storage area sanitation.

Authorized for use in meat plants
Authorized for floor and wall cleaning in federally inspected meat and poultry establishments by the technical services division, United States Department of Agriculture, Consumer and Marketing service.

- **Immediately starts to dissolve grime and suspend soil.**
